RE: SR10 Fuel

Priority: High

The SR10 requires the use of premium grade unleaded fuel with the minimum octane ratings of:

MON: 91

RON: 98

Oxygen: 2.9%

And less than 5% ethanol

Radical Performance Engines (RPE) recommends the use of Shell V-power (UK spec), Sunoco 260GT (available globally), or VP MS109 (Available at AMC).

If fuel used does not meet the minimum rating, this could lead to internal engine damage which is not covered by Radical.
